About Us

Ortus Solutions is a leading innovator in software development, dedicated to delivering cutting-edge web-based solutions. With a strong commitment to quality and innovation, we provide expert services in modern application development.

GSA Contract Number
47QTCA23D00DH

Formed 2006, Ortus Solutions is an established professional software development firm.

8a-certified small business with a proven track record of excellence.

Specialized in **mobile and web application design, development and deployment.**

Creators of 350+ web development tools powering application across the world.

Open Source Software publishers with a focus on empowering business and developers alike

Core Competencies

Modernization and Digital Transformation

- Expert development and modernization of legacy applications using ColdBox MVC and the BoxLang JVM Language, enhancing performance and maintainability.
- Tailored solutions for secure, scalable, and efficient web-based government applications.

Proprietary JVM Programming Language

BOXLANG[®]

↘ www.boxlang.io

- Optimized for high-performance, mission-critical applications.
- Comprehensive support for migration from legacy languages to BoxLang.
- Increased system reliability and reduced operational costs.
- Drop-in replacement for Adobe ColdFusion
- Multi-Runtime: CLI Applications, Lambdas, Web, Mobile, and more.

Custom Software Development

A simple black arrow pointing downwards, indicating a flow or continuation.

- End-to-end web application development using modern frameworks (ColdBox MVC, Vue.js, Quasar).
- Multi-tenant and multi-region solutions for government services and data management.
- Robust API development and integration, including secure and compliant data exchange.

DevOps and Infrastructure Automation

- Automated CI/CD pipelines for rapid, reliable deployment.
- Infrastructure management on Digital Ocean, AWS, Azure, and other cloud environments.
- Scalable containerized applications leveraging Docker and Kubernetes.

Cybersecurity and Compliance

- Adherence to government standards (e.g., FISMA, NIST).
- Secure coding practices and vulnerability assessments to safeguard government data.
- Role-based access control (RBAC) and audit logging for high-security environments.

Training and Technical Support

- Comprehensive training for IT teams on BoxLang and ColdBox frameworks.
- Ongoing technical support and maintenance for deployed solutions.
- Documentation and knowledge transfer for long-term sustainability.

System Integration and Data Interoperability

- Integrating diverse data sources and legacy systems into unified platforms.
- Real-time data processing and analytics for government decision-making.
- Custom connectors and middleware for seamless data flow.

Core Products

We believe in the power of
great tools to deliver great
solutions.

ColdBox is a conventions-based MVC Framework. It provides a set of reusable code and tools that can be used to increase your development productivity, as well as a development standard for working in team environments. ColdBox is comprehensive and modular, which helps address most infrastructure concerns of typical CFML applications. It is composed of several standalone libraries that in turn compose the ColdBox Platform.

ColdBox powers scalable apps since 2005 with support and training.

COMMANDBOX

A standalone, native tool for
Windows, Mac, and Linux

CommandBox will provide you with a Command Line Interface (CLI) for developer productivity, tool interaction, package management, embedded CFML server, application scaffolding, and some sweet ASCII art.

CONTENTBOX[®]

A powerful professional
open-source headless CMS.

Designed to scale, perform with security in mind,
and multi-site ready.

BOXLANG[®]

Dynamic : Modular : Productive

A modern, dynamically and loosely typed
scripting language for multiple runtimes.

For the Java Virtual Machine (JVM) giving you tons of Object-Oriented (OO), Functional Programming (FP) Constructs, and dynamic Metadata Programming (MP)

Services

Custom Software Development

Need a website, API, mobile or application?
We have all the tools and services to get
your project built!

Our Skills

- Software & Mobile App Developers
- UI/UX Designers
- Data Analysts
- Business Analysts
- Project Managers

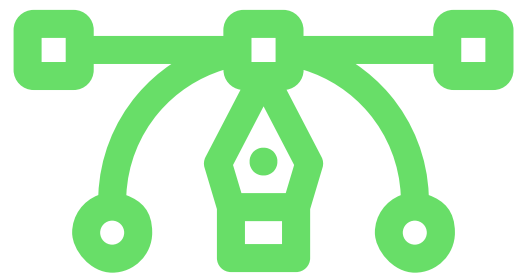

Custom Software Development

Need a website, API, mobile or application?
We have all the tools and services to get
your project built!

Our Skills

- Infrastructure Architects
- Software Testers
- Security Auditors
- DevOps Engineers
- Software Architects

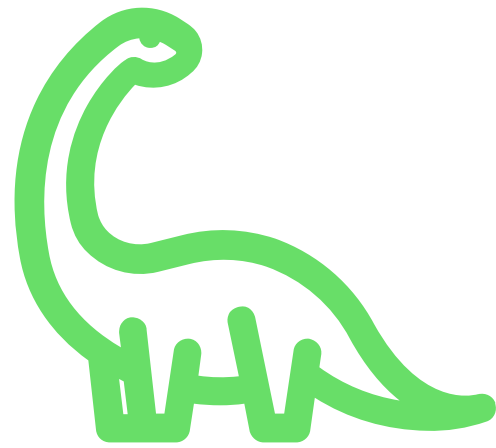

UX/UI Design

We offer architecture & design services
for your next big project.

Mobile App

Create fully-responsive websites,
progressive apps and hybrid mobile apps.

Legacy Modernization

Bring your Legacy Applications to the
twenty-first century!

Quality Assurance

Test your application functionality,
performance and security.

Business Intelligence

Centralize and automate data with a real-time BI dashboard to uncover insights, track KPIs, and enhance decision-making for your business.

DevOps & Infrastructure

Let us design your next server farm, CI/CD or fine tune it for optimal performance.

Performance & Security

Optimize performance for your apps,
detect and remediate security
vulnerabilities.

Expert Training

We have a wide selection of CFML
training courses which can be
delivered on-site or virtually.

Staff Augmentation

Accelerate your Web Development
Projects with On-Demand Software
Development Experts!

Elasticsearch Solutions

Enhance search with expert
consulting and implementation of
Elasticsearch and AWS OpenSearch

Cloud Servers

a new way to the cloud

Offers a seamless and high-performance **Ubuntu and Windows-based** environment to deploy and manage **BoxLang applications** on **Microsoft Azure and AWS**. This virtual machine is pre-configured with everything you need to start coding, deploying, and scaling your applications with ease.

Amazon Web Services

Set up a fast, secure, and performance-driven BoxLang environment on AWS with our **Ubuntu and Windows-based** virtual machines. This pre-configured AMI streamlines development, offering seamless scalability and effortless cloud deployment for both developers and enterprises.

BOXLANG
With CommandBox

AI services

Smarter Software with AI Insight

Streamline workflows, automate tasks, and unlock insights with AI solutions tailored to your business.

OUR SIMPLE 3-STEP PLAN

1

Schedule a Discovery Call

Tell us about your challenges and goals so we can understand where AI can deliver real impact.

2

Get a Custom AI Strategy

We design a tailored plan that fits your workflows, data, and business priorities.

3

Build and Scale with Confidence

We implement intelligent solutions that grow with your needs — and support you every step of the way.

Professional Support

Servicing our open-source community since 2006!

Our support programs cover the following areas:

- Online private ticketing system
- Development discounted rates
- Priority patches & updates
- Custom builds
- Up to 20% off training discounts

Professional Support

Servicing our open-source community since 2006!

Our support programs cover the following areas:

- Up to 20% off book discounts
- Up to 20% off Ortus commercial product
- Custom modules
- Phone/Online support by appointment only

Labor Categories

Available through the GSA.

● SIN: 54151S

Senior Software Architect

Leads software innovation, designs web applications, supervises and mentors architects.

Software Architect

Designs enterprise software, web applications, and ensures seamless user experience.

Senior Web Developer

Leads full-stack development, creates, extends, maintains apps, supervises, and mentors.

Web Developer

Develops full-stack web apps, extends functionality, and maintains under supervision.

Junior Web Developer

Codes front-end or back-end tasks, extends functionality, under senior guidance.

UI/UX Designer

Designs web UX/UI for intuitive navigation under senior designer's supervision.

Labor Categories

Available through the GSA.

● SIN: 54151S

Junior UI/UX Designer

Designs web UX/UI elements for intuitive navigation under senior guidance.

Senior DevOps Engineer

Leads DevOps, automates deployments, ensures reliability, supervises, and mentors engineers.

DevOps Engineer

Automates testing, release, deployment of web apps under DevOps supervision.

Senior DBA

Manages, implements, and maintains databases, ensuring efficiency and security.

Software Tester

Tests software to detect defects and ensure high quality before release.

Senior Project Manager

Leads, plans, executes software projects, oversees and supervises managers.

Past Performance

NEFB

Naval Expeditionary Forensics and Biometrics

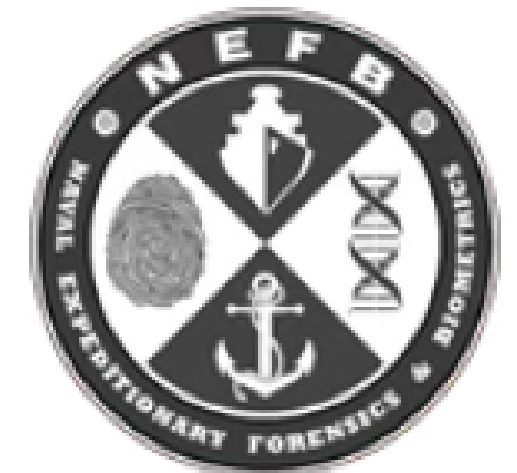

Ortus Solutions has supported the Naval Expeditionary Forensics and Biometrics (NEFB) task order as a subcontractor since 2018. Since then, Ortus has led program efforts related to the WEAT web application development, testing and deployment.

Customer survey review:

"Performance met and exceeded scope/project expectations. Ortus went above and beyond in resolving critical issues in a timely manner and demonstrated capable leadership and project ownership."

Service/Technologies

- Custom Development
- ElasticSearch
- Cloud Migrations
- Security Hardening
- Training
- Software Architecture
- Agile Team Management
- ColdBox
- CommandBox
- REST APIs
- Vue JS
- MSSQL
- Performance tuning
- Web accessibility

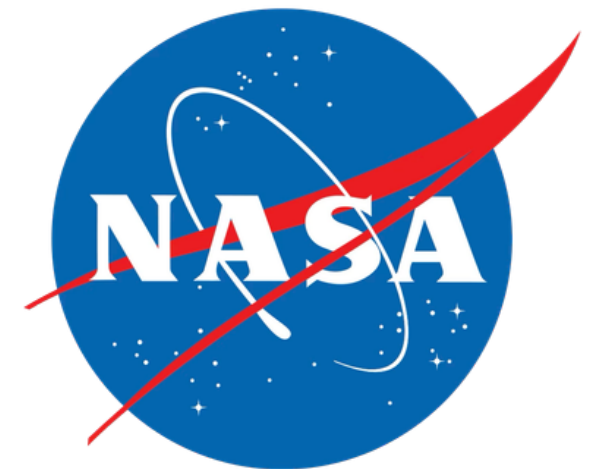

NASA

Ortus Solutions has supported NASA with on-site training and consulting for their web implementations using powered by Ortus software. Ortus has also trained them on modern web development architecture and methodologies such as behavior- and test-driven development (BDD + TDD), object-oriented design and MVC architecture.

Service/Technologies

- Software Architecture
- ColdBox
- TextBox
- CommandBox
- Training

Department of Labor

Ortus Solutions has supported the Department of Labor with on-site training and support for ColdBox application development and MVC architecture.

Service/Technologies

- Training
- ColdBox
- TextBox
- CommandBox
- Security hardening

Illinois Office of Comptroller

Ortus was in charge of migrating their main website and all its components to Ortus Open Source Content Management System: ContentBox CMS. The migration included a redesign of the IOC's entire Software development life cycle, the introduction to agile methodologies for delivering code and the automation of deployments and tests.

Service/Technologies

- ContentBox CMS
- Custom Development
- Infrastructure Development
- DevOps

US Navy

Sole Source Acquisition to deliver new API and new modules, Weat LAB and Meestro for the WEAT 3.0 web application; developing transfer mechanisms for migrating data from the legacy system and deploying the app at Fort Gillem Atlanta, GA.

On-site Training of modern web development practices and technologies namely developing web application with a MVC design pattern and behavior-driven development

Service/Technologies

- Custom module development

InFlow

Subcontracting on-site training to teach on MVC design pattern, enterprise architecture design, building RESTful API and software development best practices, for new U.S. Navy Dahlgren team members joining WEAT development efforts.

Service/Technologies

- Training
- Software Architecture

PAE

Subcontracting work for the delivery of various WEAT 3.0 components: ORM Design, UI Mockups, Security Framework, Modules Framework, and Site, Person, User and Admin modules.

Service/Technologies

- Application Component Development
- Custom Development

PAE

WorkSource Oregon

On-site training, help their development team learn and adopt modern web development practices and technologies, such as object-oriented programming and MVC architecture.

Security auditing of their web system and web applications servers' performance analysis and optimization.

Service/Technologies

- Training
- ColdBox
- TestBox
- CommandBox
- Software Architecture

esri

Design and implementation of a newer and more secured infrastructure with automated code deployment processes to host their back-office applications. Upgraded into latest software, configured integration settings and refactored deprecated code for 250+ web applications.

Service/Technologies

- ColdBox
- TestBox
- CommandBox
- Legacy Migration
- Modernization
- NGX
- Couchbase

Central San

Migration of their existing web application used to manage their internal operations systems into a new development framework with its own automated testing suite, dependency injection and logging.

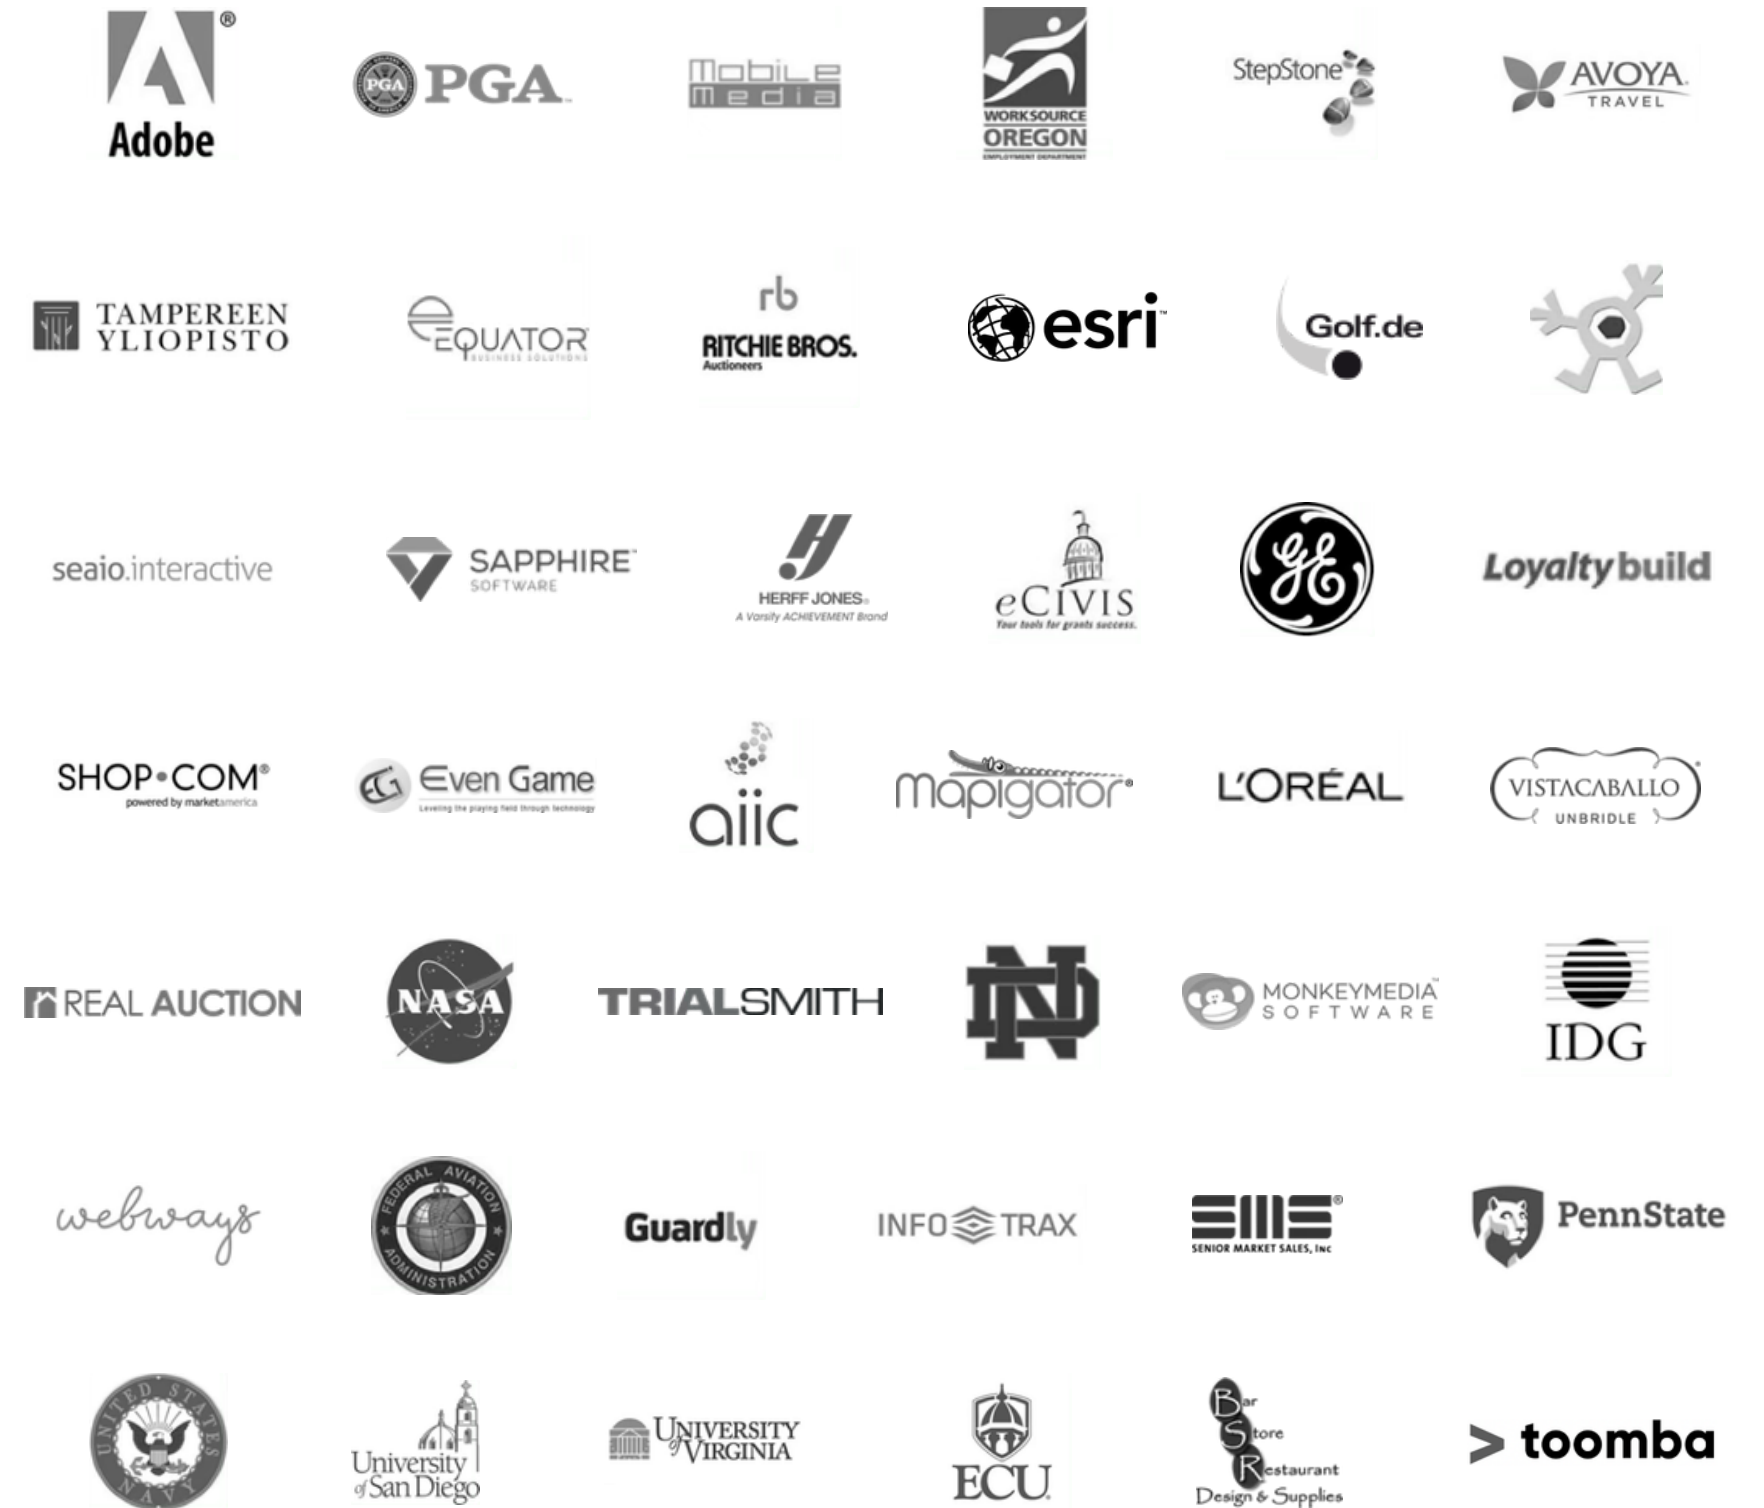

Service/Technologies

- Modernization
- ColdBox MVC Migration
