About Us

Ortus Solutions is a leading innovator in software development, dedicated to delivering cutting-edge web-based solutions. With a strong commitment to quality and innovation, we provide expert services in modern application development.

GSA Contract Number
47QTCA23D00DH

Formed 2006, Ortus Solutions is an established professional software development firm.

8a-certified small business with a proven track record of excellence.

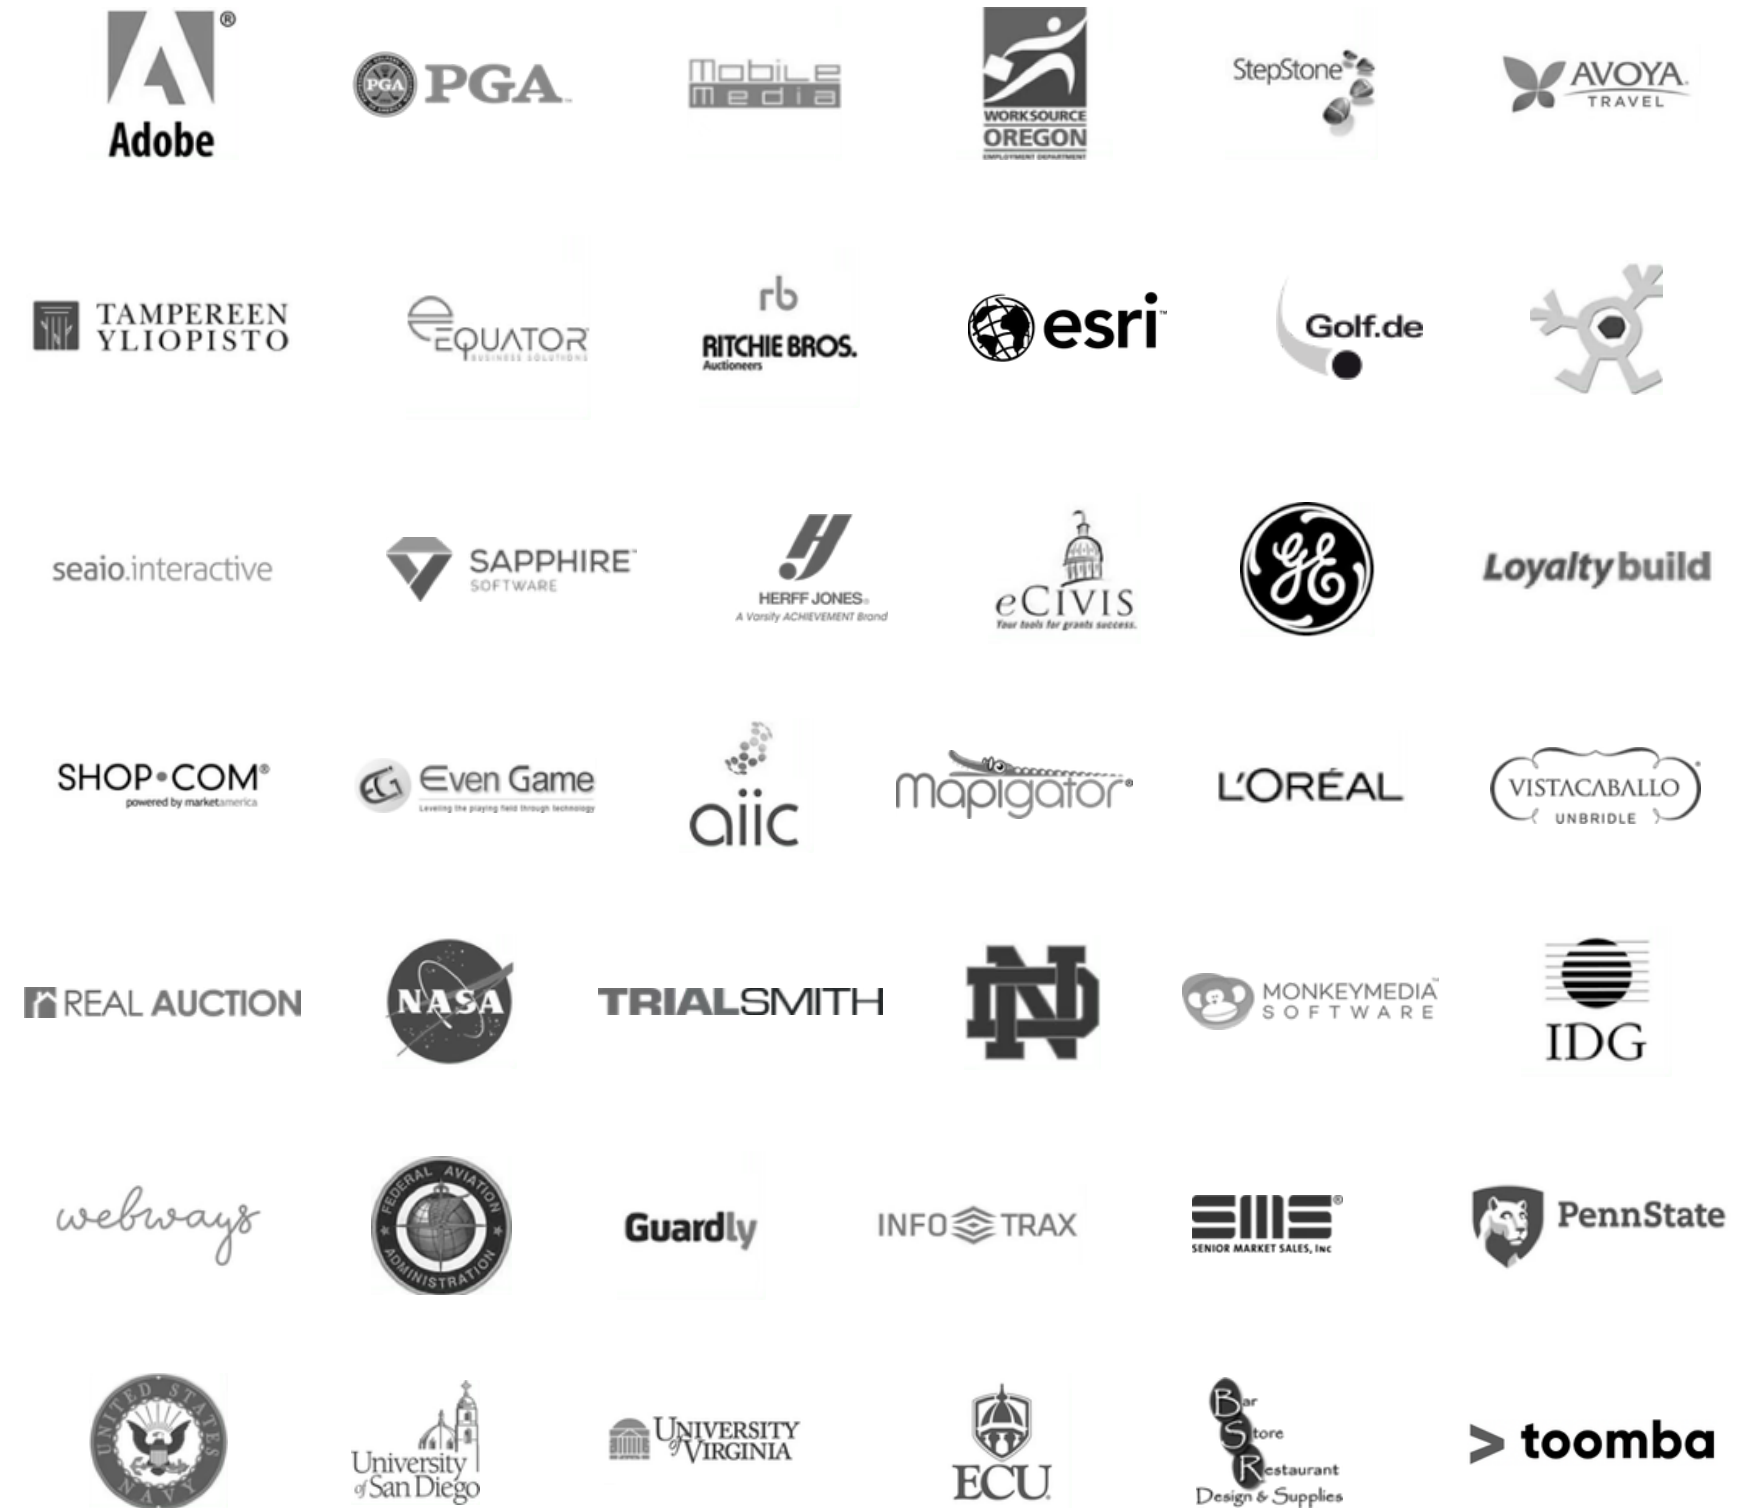

Specialized in **mobile and web application design, development and deployment.**

Creators of 350+ web development tools powering application across the world.

Open Source Software publishers with a focus on empowering business and developers alike

Our tools power Apps

Around the World!

Capabilities Overview

A Team of Experts

We are passionate about web development

Our Skills

- Software & Mobile App Developers
- UI/UX Designers
- Data Analysts
- Business Analysts
- Project Managers
- DBAs

A Team of Experts

We are passionate about web development

Our Skills

- Infrastructure Architects
- Software Testers
- Security Auditors
- DevOps Engineers
- Software Architects
- Senior Software Engineers

UX/UI Design

We offer architecture & design services for your next big project.

Mobile App

Create fully-responsive websites, progressive apps and hybrid mobile apps.

Legacy Modernization

Bring your Legacy Applications to the twenty-first century!

Quality Assurance

Test your application functionality, performance and security.

Elasticsearch & Opensearch Solutions

Enhance search with expert consulting and implementation of Elasticsearch and AWS OpenSearch

Business Intelligence

Centralize and automate data with a real-time BI dashboard to uncover insights, track KPIs, and enhance decision-making for your business.

DevOps & Infrastructure

Let us design your next server farm, CI/CD or fine tune it for optimal performance.

Performance & Security

Optimize performance for your apps, detect and remediate security vulnerabilities.

Expert Training

We have a wide selection of CFML training courses which can be delivered on-site or virtually.

AI Integrations

Smarter Software with AI Insight

Streamline workflows, automate tasks, and unlock insights with AI solutions tailored to your business.

OUR SIMPLE 3-STEP PLAN

1

Schedule a Discovery Call

Tell us about your challenges and goals so we can understand where AI can deliver real impact.

2

Get a Custom AI Strategy

We design a tailored plan that fits your workflows, data, and business priorities.

3

Build and Scale with Confidence

We implement intelligent solutions that grow with your needs — and support you every step of the way.

Areas of Software **Development Experience**

-  Travel
-  Financial Services
-  Insurance
-  Retail
-  Transportation
-  Grants Management

-  US State Government
-  Scientific Research
-  Flower Farms
-  Real Estate
-  Manufacturing
-  Education

-  US Military
-  Background Checks
-  Catering
-  Job Boards
-  Fitness & Wellness
-  eCommerce

Core Services

Support & Consulting

We provide structured, SLA-driven support designed to keep mission-critical systems stable, optimized, and continuously evolving.

Support Model

- SLA-based agreements with defined response times
- Continuous support across supported technologies
- Dedicated ticketing system and **asynchronous communication via Slack**

Engagement

- Flexible retainer or on-demand support
- Scalable based on client needs
- Direct access to senior engineers and product-focused consultants

Support & Consulting

Our Plans	XS	S	M	L	XL
Retainer	5	10	20	30	30+
Rate	\$265/hr	\$245/hr	\$225/hr	\$200/hr	Custom
Duration	6 months	6 months	12 months	12 months	Custom
Response Time*	3 B.D.	3 B.D.	2 B.D.	1 B.D.	Custom
Price	\$1,325.00	\$2,450.00	\$4,500.00	\$6,000.00	Custom

Support & Consulting

Servicing our open-source community since 2006!

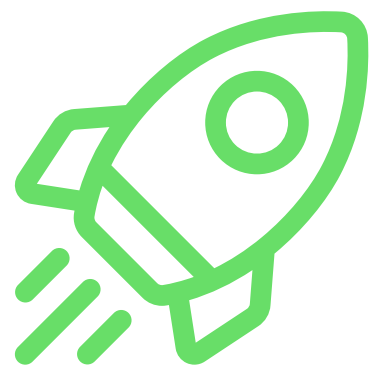

Our support programs cover the following areas:

- Online private ticketing system
- Development discounted rates
- Priority patches & updates
- Custom builds
- Up to 20% off training discounts

Software Projects

End-to-end delivery of custom software solutions tailored to your business needs.

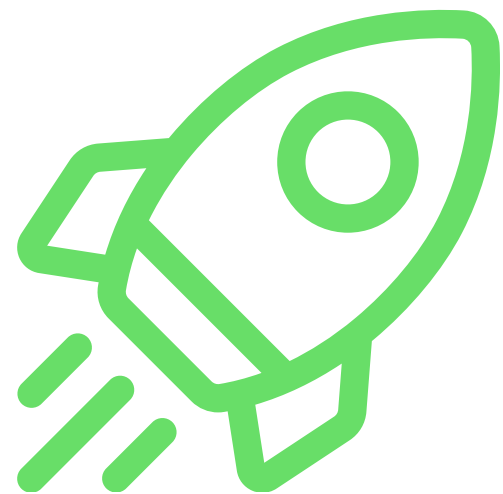

Our Approach – Keep it Simple

- Requirements Analysis
- Scope of Work & Proposal
- Implementation
- Monitoring
- Testing & Delivery

Project References

Selected Highlights

NASA Portal to the Universe

Built a scalable BoxLang-powered platform delivering global space science data.

Direct Indexing Platform

Developed a value-based investment automation portal for personalized portfolio management.

InstallNet

Delivered an enterprise notification system supporting large-scale operations.

Avoya Travel

Engineered a high-performance booking engine to improve conversion and user experience.

Narvar Integration

Implemented a seamless insurance quoting integration for logistics workflows.

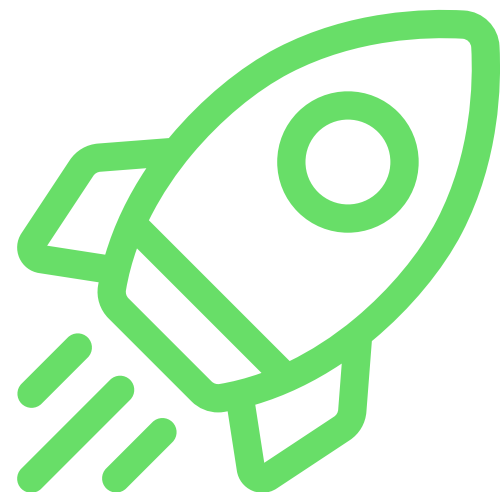

Loeb Electric

Built a configurable panel builder to streamline complex product configuration.

Project References

Selected Highlights

SBA

Modernized legacy platforms to improve scalability, performance, and maintainability.

Bridgeway

Developed secure APIs enabling seamless financial system integrations.

Serco

Enhanced US Navy critical systems to improve reliability and operational efficiency.

Simpleview

Redesigned infrastructure and remediated security vulnerabilities to strengthen compliance.

Senior Market Sales

Dental Quoting Engine for Analyzing Dental Insurance plans and total costs comparisons factoring in users' dental hygiene.

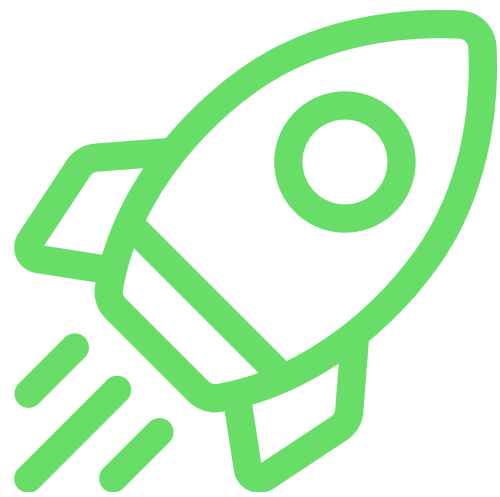

Versa Valves

Led full system redesign and implementation to modernize operations.

Project References

Selected Highlights

Tau Beta Pi – Engineering Honor Society

Provisioned and deployed new infrastructure to support growth and reliability.

USRA (Meetings & Conferences App)

Built a mobile app to streamline event management and attendee engagement.

Order My Gear

Performed security audit and remediation to mitigate risk and improve compliance.

US Navy

Delivered system modernization and custom development for mission-critical environments.

West Fraser

Security Audit and Vulnerabilities Remediations

...and many more

Staff Augmentation

The level of engagement that your company needs

Engagement Model

- Time & Materials or Fixed Fee
- Team composition tailored to your required skill set and tech stack
- Flexible duration: 3, 6, 9 months and beyond

Operational Flexibility

- Typical ramp-up / ramp-down: ~1 month
- Notice period: 60 days
- Scalable team size based on evolving project needs

Staff Augmentation

Embedded talent within client teams

Secure Development Practices

Security First

- Secure Environment
- Isolated and auditable
- Secure handling of secrets
- Data Protection Controls
- Code Reviews and Testing
- Continuous Monitoring

IP Ownership & Confidentiality

Your IP is your IP

- Work-for-hire
- Open Source
- Ortus Licensed Software
- Reseller
- BYOL
- MCA+TOs
- MNDA

Tech Ecosystem

We believe in the power of
great tools to deliver great
solutions.

ColdBox powers
scalable apps since
2005 with support
and training.

www.coldbox.org

ColdBox is a conventions-based MVC Framework. It provides a set of reusable code and tools that can be used to increase your development productivity, as well as a development standard for working in team environments. ColdBox is comprehensive and modular, which helps address most infrastructure concerns of typical CFML applications. It is composed of several standalone libraries that in turn compose the ColdBox Platform.

The logo for CommandBox, featuring a blue and green circular icon with a white dot inside, followed by the text "COMMANDBOX" in a bold, dark blue sans-serif font.

A standalone, native tool for
Windows, Mac, and Linux

CommandBox will provide you with a Command Line Interface (CLI) for developer productivity, tool interaction, package management, embedded CFML server, application scaffolding, and some sweet ASCII art.

FORGEBOX

THE cloud package repository.

Designed to discover, share, and manage reusable code with collaboration, scalability, and modern development workflows in mind.

CONTENTBOX

A powerful professional
open-source headless CMS.

Designed to scale, perform with security in mind,
and multi-site ready.

B^{OX}LANG[®]

Dynamic : Modular : Productive

A modern, dynamically and loosely typed
scripting language for multiple runtimes.

For the Java Virtual Machine (JVM) giving you tons of Object-Oriented (OO), Functional Programming (FP) Constructs, and dynamic Metadata Programming (MP)

Cloud Servers

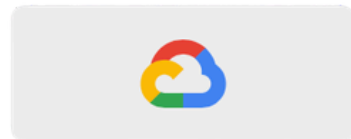

a new way to the cloud

Offers a seamless and high-performance **Ubuntu and Windows-based** environment to deploy and manage **BoxLang applications** on **Microsoft Azure and AWS**. This virtual machine is pre-configured with everything you need to start coding, deploying, and scaling your applications with ease.

Amazon Web Services

Set up a fast, secure, and performance-driven BoxLang environment on AWS with our **Ubuntu and Windows-based** virtual machines. This pre-configured AMI streamlines development, offering seamless scalability and effortless cloud deployment for both developers and enterprises.
